

LPS II - Solar connection kit, 1 panel

Kit for connecting and mounting a solar module up to approx. 660 W, for use with our flexible modules or fixed modules on the LPS II.

- // Simple installation
- // Quick assembly
- // Suitable for all LPS II variants

The connection kit consists of an MC4 plug/coupling, the matching roof bushing, M8/M4 cable lugs and bushings as well as the adhesive and sealant for fastening.
Note: A suitable fuse with fuse holder is also required.
