

Equipment built-in cable with temperature sensor

Pre-assembled cable for installation in emergency vehicle equipment, designed to connect an external charger with a temperature sensor via a TE connector.

- // Ideal für DC-DC-Ladegerät TS Pro
- // Temperature sensor included
- // Pre-assembled
- // Easy to install

Pre-assembled cable harness for installation in emergency vehicle equipment, such as generators or portable fire pumps, to establish a secure plug connection between a starter battery fitted in the equipment and an external charger (LEAB TS Pro).
Cable harness (1 metre) comprising:
TE installation socket (CPC 17), 3-pin
2 × M8 ring terminals for connecting the battery
Temperature sensor, self-adhesive
