

Auxiliary Generator 14 V/150 A

High-power 14 V auxiliary generator with a charging current of 150 A and an integrated regulator, without pulley.

// Rated voltage: 14 V
// Charging current: 150 A
// Compact power packages

For years, our auxiliary generators have been considered the powerful power unit of a vehicle. Thanks to their compact design and modern technology, high power is available even at low revolutions per minute. They are available in nominal voltages of 14 V and 28 V and with a charging current of 150 A and 100 A. Higher power ratings are available on request.

Technical Information

Charging current	150 A*
Nominal voltage	14 V*
Alternator rpm (continuous)	15,000 1/min
Alternator rpm (intermittend)	18,000 1/min
Operating temperature	-40 °C ... +110 °C
Output current	75 A (at 1,800 1/min); 155 A (at 6,000 1/min)
Resistor (Excitation Winding)	2.85 ?
Dimensions (L x W x H)	230 x 230 x 230 mm
Weight	8 kg
