

## Champ Charger 1207 (gel/AGM)

**Small, compact and waterproof 12 V charger for universal use.**

- // Compact design
- // Robust: metal housing
- // Waterproof: protection class IP67
- // Available for all lead-acid battery types

The Champ charger is suitable for charging 12 V wet/AGM batteries. With an output voltage of 12 V and a charging current of 7 A, the compact and lightweight charger ensures particularly gentle charging of the charger thanks to the pre-programmed charging characteristic curve.

## Technical Information

|                                     |                                       |
|-------------------------------------|---------------------------------------|
| Cable length, AC input              | 0.2 m*                                |
| Cable length, DC output             | 1.5 m*                                |
| Charging current                    | 7 A*                                  |
| Connection DC output                | Ring terminal, M8*                    |
| Connector, AC input                 | DEFA*                                 |
| Input voltage (AC)                  | 230 V*                                |
| Output voltage (DC)                 | 12 V*                                 |
| Type of battery                     | Lead acid (gel, AGM)*                 |
| Battery capacity                    | 55 Ah ... 170 Ah                      |
| Charging characteristic             | IU1U2 charging characteristic, preset |
| Complies with DIN 14679:2024-02     | yes (except for output signal)        |
| Input frequency range               | 40 Hz ... 60 Hz                       |
| Input voltage range                 | 190 V ... 270 V                       |
| International Protection (IP class) | IP67                                  |
| Level of efficiency                 | > 88 %                                |
| Main charge                         | 14.4 V                                |
| Operating temperature               | -30 °C ... +70 °C                     |
| Output voltage                      | 12 V                                  |
| Protection class                    | I                                     |
| Ripple                              | < 3 %                                 |
| Switching frequency                 | 100 kHz                               |
| Trickle charge                      | 13.8 V                                |
| Dimensions (L x W x H)              | 80 x 155 x 43 mm                      |
| Weight                              | 0.8 kg                                |
